

EASY LIGHT SYSTEM FOR SPORT LIGHTING

MAIN FUNCTIONS OF THE APP

- Automatically manage light points (wireless node search)
- Group creation and automatic node configuration
- Dimming of groups
- Creation of keyboard scenarios (ON/OFF/DIMMING per group)

NB: It is possible to install more than one wireless keyboard with different scenarios.

ON/OFF CONTROL

The customer is always responsible for turning the system on and off. Using the KEYPAD and APP, the appliances can still be turned on and off wirelessly (with consequent power consumption in standby mode).

ANTENNA OPTION

If the keyboard is installed in shielded internal environments, it is necessary to install the external antenna .
